

The Women's Issues Advisory Council would like to make the following motions:

1. We move to establishment of a diverse task force to investigate implementation of lactation rooms in order to bring CSU into compliance with Fair Labor Standards. The task force will include representation at minimum from Campus Services, The School of Nursing faculty, the Office of the Provost, and current or recent breastfeeding moms (i.e., faculty, staff, and students).
2. We move to have the Faculty Senate investigate improvements on the CSU Leave policy, outside of Sick Leave and FMLA policies that currently exist, that would enhance the benefits received by CSU faculty and staff. For faculty, the investigation will include developing a standardized policy across campus to dictate instructor expectations and course coverage while having to utilize leave (i.e., Sick Leave and/or FMLA).
3. We move that an updated CSU website be established that reorganizes the sexual harassment reporting process and makes prominent and in simple language the instructions for reporting incidents on the landing page when searched via the CSU search feature.
